WHO WE ARE

Founded in 1993 International Wire & Cable has grown from being "just" a wire and cable distributor to a diverse distributor while holding onto our roots in the electrical & electronic wire and cable industry. We have also moved into other markets to include data networking cables, components, data furniture, fiber optics, and much more.

The majority of our sales force has on average 25+ years in the wire and cable industry; our staff is knowledgable and experienced. We *know the products* and the part numbers. Instead of relying heavily on the customer to know the part number, as so many in this industry do.

International Wire and cable works with Aerospace, Automotive, Food & Beverage industries, hospitals, machine builders, robotic manufacturers, contractors to name a few, as well as to the general public.

OUR TEAM

EXT. 100 **Accounts Payable**
Laura Rowell
Laura@intwirecable.net

EXT. 101 **Sales**
Stan Sowinski
