

GEOPHYSICS DONE RIGHT

www.gii.co.il

GII at a glance

The Geophysical Institute of Israel (GII) is a leading boutique onshore geophysical services provider. Working with clients in governmental and private bodies around the globe since 1957, the GII has developed to become one of leading geophysical contractors in the Oil and Gas, Mining, Homeland Security and Environmental sectors.

As experts in applied geophysics, we employ seismic waves, gravity, magnetics, and electromagnetic methods to explore, map and discover elements in the earth, without physically penetrating the surface.

Our specialty is onshore 2D and 3D seismic data acquisition surveys in challenging environments, from concept design through quality control and full data processing to final interpretation.

To complement this, we can provide a suite of Micro-Seismic, Magnetic, Gravimetric, and Geo-Electric services. Lead by experienced professionals, our state-of-the-art equipment, software and computing power, are leveraged to bring best in class results to our clients.

- Specialists in Non-Disruptive Onshore Sub-Surface Geophysical Imaging
- 61 years of successful operations with over 20 years of global operations
- Vast experience in desert, forest, marsh, lakes & urban environments

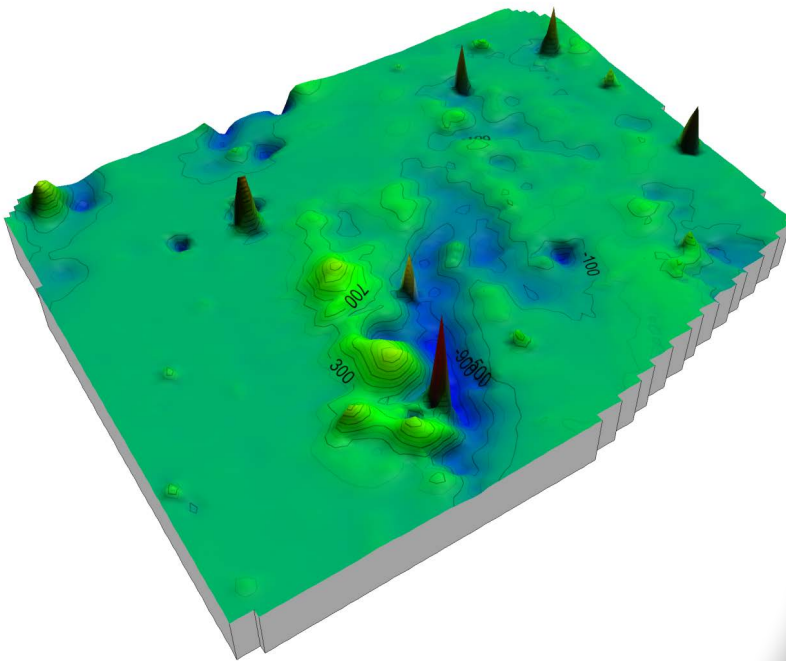

We take pride in being able to
Overcome any obstacle
In any environment
For every client
Rain or shine

Industries Served

- Oil and Gas
- Mines and Minerals
- Homeland Security
- Geothermal
- Sub-Surface Engineering
- Water and Hydrogeology
- Archaeology

At GII we are passionate about
sub-surface exploration.

By focusing on Discovering,
and not simply 'surveying'

We create the innovative environment
required for meeting our clients'
special needs

Sub-surface exploration in the 21st century is required to
be data intensive, time sensitive and cost effective.

The GII draws on 61 years of experience, collaborations
with the most innovative high-tech companies and strong
financial backing, to provide sub-surface imaging and
detection services beyond expectations.

Solutions

Our solutions encompass a variety of industries including Petroleum Resources, Mines and Minerals, Sub-Surface Engineering, Hydrological Exploration and more.

- Onshore Oil and Gas Exploration
- Fracking and Induced Seismicity Monitoring
- Ore Anomaly Detection
- Groundwater Applications
- Mapping Brine Intrusion to Aquifers
- Geological Fault Mapping
- Sub-surface Utility Infrastructure Mapping
- Quarry/Engineering Vibration Supervision
- Hazardous Waste and Dumpsite Surveys
- Void and Sinkhole Detection
- Soil to Bedrock Depth Mapping
- Ground Resistivity Profiles
- Applied Geophysical Research
- Consulting
- Training
- And more...

Applying state-of-the-art technology
to real world challenges...

Services

- 2D & 3D Seismic Acquisition
- 2D & 3D Advanced Seismic Processing
- Geophysical Campaign Design
- LVL and Uphole surveys
- Induced Seismicity long term Microseismic monitoring
- Microseismic Monitoring for Hydraulic Fracking
- DC GeoElectrics - surface and downhole
- Magnetics and Electromagnetic
- Gravity & Microgravity
- Vibration Monitoring
- And more...

Anytime. Anywhere.

Experts in All Land Environments

- Urban
- Farmlands
- Deserts and Dunes
- Mountains
- Forests
- Delicate Natural Habitats
- Transition Zones and Marshes
- Lakes and Shallow Water

Anytime. Anywhere.

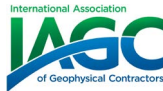

Corporate Responsibility

The GII is committed to operating its global business in a moral, ethical and professional manner and with the greatest care to people, assets and the environment.

This is expressed on a daily basis by:

- Having HSE on the agenda in every meeting
- Allocating resources, time and money to HSE
- Ensuring HSE is considered in business decisions
- Setting a personal example in day-to-day work
- Year-round training, monitoring and auditing
- Recognition of performance when objectives are achieved

The GII management motivates their employees and encourages them to participate in a pro-active HSE culture.

Anytime.
Anywhere.

Putting faith in GII, time and again...

In addition to hundreds of projects in and around Israel,
The GII has been Globally active since 1997, with over
27 full scale projects in 21 years.
