# Non-GAAP Financial Measures

We present Non-GAAP financial measures which are derived from the statements of operations, cash flow and balance sheets of DXC. These Non-GAAP financial measures include earnings before interest and taxes ("EBIT"), adjusted EBIT, adjusted EBIT excluding pension income, adjusted EBIT margin, adjusted EBIT margin excluding pension income, adjusted earnings before interest, taxes, depreciation and amortization ("adjusted EBITDA"), Non-GAAP income from continuing operations before income taxes, Non-GAAP net income attributable to DXC and Non-GAAP basic and diluted EPS, organic revenue growth, constant currency revenue, free cash flow, Non-GAAP cost of services, Non-GAAP SG&A expense, Non-GAAP depreciation and amortization, Non-GAAP gross profit, Non-GAAP tax rate, Non-GAAP income tax expense, Non-GAAP other income, and Net Debt/adjusted EBITDA.

We believe EBIT, adjusted EBIT, adjusted EBITDA, adjusted EBIT margin, adjusted EBITDA margin, Non-GAAP income before income taxes, Non-GAAP net income attributable to DXC, Non-GAAP basic and diluted EPS provide investors with useful supplemental information about our operating performance after excluding certain categories of expenses.

We believe organic revenue growth and constant currency revenue provide investors with useful supplemental information about our revenues after excluding the effect of currency exchange rate fluctuations for currencies other than U.S. dollars in the periods presented, and impact of acquisitions and divestitures. See below for a description of the methodology we use to present organic revenue growth and constant currency revenue.

One category of expenses excluded from adjusted EBIT and adjusted EBITDA, Non-GAAP income from continuing operations before tax, Non-GAAP net income attributable to DXC and Non-GAAP EPS, incremental amortization of intangible assets acquired through business combinations, may result in a significant difference in period over period amortization expense on a GAAP basis. We exclude amortization of certain acquired intangible assets as these non-cash amounts are inconsistent in amount and frequency and are significantly impacted by the timing and/or size of acquisitions. Although DXC management excludes amortization of acquired intangible assets, primarily customer-related intangible assets, from its Non-GAAP expenses, we believe that it is important for investors to understand that such intangible assets were recorded as part of purchase accounting and support revenue generation. Any future transactions may result in a change to the acquired intangible asset balances and associated amortization expense.

Another category of expenses excluded from adjusted EBIT and adjusted EBITDA, Non-GAAP income from continuing operations before tax, Non-GAAP net income attributable to DXC and Non-GAAP EPS, impairment losses, may result in a significant difference in period over period expense on a GAAP basis. We exclude impairment losses as these non-cash amounts, generally an acceleration of what would be multiple periods of expense, have not occurred frequently. Further assets such as goodwill may be significantly impacted by market conditions outside of management's control.

Free cash flow is defined as net cash provided by operating activities less capital expenditures. Free Cash Flow is utilized by our management, investors, and analysts to evaluate cash available to pay debt, repurchase shares and provide further investment in the business. Net debt is defined as the sum of short-term debt, current maturities of long-term debt and long-term debt less cash and cash equivalents. We believe this measure provides investors with greater transparency with respect to our net leverage.

There are limitations to the use of the Non-GAAP financial measures presented in this report. One of the limitations is that they do not reflect complete financial results. We compensate for this limitation by providing a reconciliation between our Non-GAAP financial measures and the respective most directly comparable financial measure calculated and presented in accordance with GAAP. Additionally, other companies, including companies in our industry, may calculate Non-GAAP financial measures differently than we do, limiting the usefulness of those measures for comparative purposes between companies.

Selected references are made to revenues on an "organic basis" so that certain financial results can be viewed without the impact of fluctuations in foreign currency rates and without the impacts of acquisitions and divestitures, thereby providing comparisons of operating performance from period to period of the business that we have owned during all periods presented. Organic revenue growth is calculated by dividing the year over year change in GAAP revenues attributed to organic growth by the GAAP revenues reported in the prior comparable period. Organic revenue is calculated as constant currency revenue excluding the impact of mergers, acquisitions or similar transactions until the one-year anniversary of the transaction and excluding revenues of divestitures during the reporting period. Revenues on a "constant currency basis" are Non-GAAP financial measures calculated by translating current period activity into U.S. dollars using the comparable prior period's currency conversion rates.

DXC does not provide a reconciliation of Non-GAAP financial measures that it discusses as part of its guidance because certain significant information required for such reconciliation is not available without unreasonable efforts or at all, including, most notably, the impact of significant non-recurring items. Without this information, DXC does not believe that a reconciliation would be meaningful. Explanations of Non-GAAP financial measures used herein are provided later in this document.
