

Learn a language for free. Forever.

Duolingo is a free online language learning program designed to be fun and accessible for everyone around the world. Built to feel like a game, users can learn 30+ different languages as they compete with each other as they learn. Lessons are "bite-sized" which means they can be picked up any time or taken on-the-go in 5 minutes at a time.

We make it easy and build gamification into every lesson:

**Personalized learning**

Duolingo lessons adapt to your learning style. Exercises are tailored to help you learn and review vocabulary effectively.

**Stay motivated with rewards**

Earn virtual currency, unlock new levels, and compete on leaderboards as you master new words, phrases, and grammar.

**Receive immediate grading**

Instantly see which answers you get correct. When you miss a challenge, we'll quickly show you how to improve.

**Improve quickly**

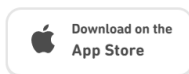

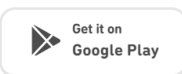

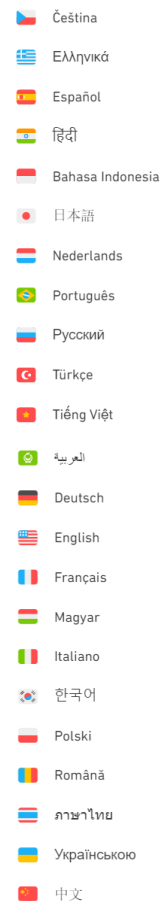

Take your learning even further with resources like [Duolingo Stories](#) and [Duolingo Podcasts](#) to improve reading and listening comprehension.

We believe everyone should have access to learn new languages:

- **Our teaching approach** - Free, bite-size lessons feel more like a game than a textbook because learning is easier when you're having fun. Our methodology is proven to foster long-term retention and our curriculum is aligned to an international standard.
- **Real-life communication** - Duolingo focuses on what learners actually want to *do* with a language. Lessons focus on a real-life goals, like ordering at a restaurant so learners develop the vocabulary and grammar to achieve that goal through varied practice in reading, writing, listening and speaking.
- **Standout content** - Along with commonly used phrases, Duolingo learners also encounter sentences quirky sentences that are memorable and fun to learn.
- **A balanced approach** - Duolingo allows learners to discover patterns on their own without needing to focus on language rules — the way you learned your first language as a child. This approach, called "implicit learning," is ideal for developing a strong foundational knowledge of a language and its rules.
- **Personalization** - With over 300 million learners around the globe, you'd think personalized instruction would be tough to pull off. But we're up for the challenge! Machine learning algorithms are always at work to serve up learning material at just the right difficulty level for each learner.

Learn 30+ languages anytime, anywhere - available around the globe:

- Duolingo offers 94 courses for 38 distinct languages, from the Top 5 most-spoken to smaller, endangered languages such as Hawaiian, Navajo and Scottish Gaelic.
