PAT. NO.	Title
51 10,680,327	Calibration system and method for calibrating an antenna array.
52 10,677,878	Method for direction finding and direction finding antenna unit
53 10,677,832	Over the air measurement system and method
54 10,677,831	Test system and method for measuring beam characteristics
55 10,674,354	Wireless communication device, wireless communication system and wireless communication method
56 10,673,543	Method and apparatus for providing a network profile
57 10,670,730	Measuring system and measuring method for model based generation of global navigation satellite system signals
58 10,670,631	Method and a measuring device for investigating signal parameters
59 10,666,539	Signal generator, method and test system for testing a device under test
60 10,666,490	Method and apparatus for estimation of a bit rate of a digital signal
61 10,665,933	Antenna unit, radio frequency circuit and method for manufacturing an antenna unit
62 10,663,505	Test system and test method for performing EMC test efficiently.
63 10,663,410	Method and system for determining a permittivity of a substance layer
64 10,659,201	Method for assigning an input channel as well as signal analyzer
65 10,659,177	Method of determining a relative phase change of a local oscillator signal and method of determining a relative phase change of a radio frequency signal
66 10,659,176	Method and system for identifying a radio frequency transmitter
67 10,658,751	System and method for phase calibration of an antenna array.
68 10,651,956	Portable directional antenna, measurement arrangement and measurement method
69 10,649,023	Radio test system and method for testing a device under test
70 10,649,008	Signal correction method, system for correcting a measured signal, as well as oscilloscope
71 10,648,938	Method and system for determining optimum parameters with respect to electromagnetic behavior of a surface

- 72 [10,644,787](#)  [Method and testing system for testing a communication between a mobile device and a satellite system](#)
- 73 [10,643,657](#)  [Signal acquisition apparatus and signal acquisition method](#)
- 74 [10,641,808](#)  [Test chamber and test system](#)
- 75 [10,641,796](#)  [Oscilloscope and method for operating an oscilloscope](#)
- 76 [10,623,117](#)  [Measurement system and a method](#)
- 77 [10,623,042](#)  [Holding device for a device](#)
- 78 [10,622,723](#)  [Measuring system and measuring method for over the air measurement of electric field potential](#)
- 79 [10,620,264](#)  [Measuring system as well as method for analyzing an analog signal](#)
- 80 [10,608,916](#)  [Measuring device and method for dynamically selecting a channel bandwidth](#)
- 81 [10,608,719](#)  [Antenna array, method for testing a device under test and test system](#)
- 82 [10,608,343](#)  [Antenna system](#)
