Refine Search AN/"Netskope" AND AC/"Santa Clara"

	PAT. NO.	Title
1	11,233,815	Vulnerability remediation based on tenant specific policy
2	11,233,801	Session protocol update or upgrade web traffic
3	11,222,112	Signatureless detection of malicious MS office documents containing advanced threats in macros
4	11,190,550	Synthetic request injection to improve object security posture for cloud security enforcement
5	11,190,540	Systems and methods of detecting and responding to ransomware on a file system
6	11,184,403	Synthetic request injection to generate metadata at points of presence for cloud security enforcement
7	11,184,398	Points of presence (POPs) architecture for cloud security
8	11,178,188	Synthetic request injection to generate metadata for cloud policy enforcement
9	11,178,172	Systems and methods of detecting and responding to a ransomware attack
10	11,165,803	Systems and methods to show detailed structure in a security events graph
11	11,159,576	Unified policy enforcement management in the cloud
12	11,159,419	Policy-driven data locality and residency
13	11,106,825	Predetermined credential system for remote administrative operating system (OS) authorization and policy control
14	11,087,179	Multi-label classification of text documents
15	11,082,445	Preventing phishing attacks via document sharing
16	11,064,016	Universal connectors for cloud data loss prevention (DLP)
17	11,064,013	Data loss prevention using category-directed parsers
18	11,057,367	Assertion proxy for single sign-on access to cloud applications
19	11,025,653	Anomaly detection with machine learning
20	11,019,106	Remotely accessed controlled contained environment
21	11,019,101	Middle ware security layer for cloud computing services
22	11,019,031	Client software connection inspection and access control
23	10,990,856	Detecting image-borne identification documents for protecting sensitive information
24	10,986,150	Load balancing in a dynamic scalable services mesh
25	10,979,458	Data loss prevention (DLP) policy enforcement based on object metadata
26	10,949,961	Detecting screenshot images for protecting against loss of sensitive screenshot-borne data

27 10,938,861 T Conserving inspection bandwidth of a data inspection and loss prevention appliance
28 10,868,845 T Recovery from failure in a dynamic scalable services mesh
29 10,867,073 T Detecting organization image-borne sensitive documents and protecting against loss of the sensitive documents
30 10,862,916 T Simulation and visualization of malware spread in a cloud-based collaboration environment
31 10,834,113 T Compact logging of network traffic events
32 10,826,940 T Systems and methods of enforcing multi-part policies on data-deficient transactions of cloud computing services
33 10,819,749 T Reducing error in security enforcement by a network security system (NSS)
34 10,812,531 T Metadata-based cloud security
35 10,812,353 T Aggregate network traffic monitoring
36 10,805,352 T Reducing latency in security enforcement by a network security system (NSS)
37 10,783,270 T Methods and systems for securing and retrieving sensitive data using indexable databases
38 10,771,435 T Zero trust and zero knowledge application access system
39 10,659,450 T Cloud proxy for federated single sign-on (SSO) for cloud services
40 10,621,346 T Efficient scanning for threat detection using in-doc markers
41 10,491,638 T Application programming interface (Api)-based security for websites
