Company Profile

At a glance: Information about the companies of the STAUFF Group

For more than 50 years, the companies of STAUFF Group have been developing, manufacturing and distributing pipework equipment and hydraulic components for mechanical and plant engineering and for service and industrial maintenance.

In addition to mobile and industrial hydraulic machinery, typical applications also include commercial and special purpose vehicles, rail transportation and energy technology. Likewise, STAUFF products are used in marine, oil and gas applications and in the process, food and chemical industries.

The overall range currently includes about 50,000 standard products in ten categories from the following areas:

- Connection technology
- Fastening technology
- Shut-off and control technology
- Measuring and analysis technology
- Filtration technology
- Hydraulic accessories

The range also includes a variety of special and system solutions according to customer's specifications or based on STAUFF in-house development.

The STAUFF System Technology business segment includes precision-turned, milled, punched and bent parts according to customer's requirements and specifications.

All STAUFF products undergo relevant testing in accordance with international regulations and are governed by the high standards of the in-house quality management system. Furthermore, many items have received certifications and approvals from various international institutes, organisations and authorities who have independently confirmed the quality and performance of the products.

Wholly-owned manufacturing, sales and service facilities in 18 countries and a tight global network of authorised distribution partners ensure high presence and service paired with a maximum of availability.

The STAUFF Group companies with 1,500 employees worldwide, 650 of them in Germany, achieved an external turnover of more than 283 million euros in 2021.
