Intelligent Power and Control Systems / Headquarter: Niedernhall-Waldzimmern

Würth Elektronik ICS is a supplier of intelligent systems and components for signal and power distribution, control of functions, as well as display and operating solutions. The main customers of our electronic and electromechanical solutions include well-known manufacturers of construction and agricultural machines and of special and commercial vehicles. However, Würth Elektronik ICS also supplies industries such as industrial technology or renewable energies with high-quality standardized or customized solutions. They all benefit from our comprehensive service and know-how – from the initial idea to the series production of their products.

OUR ROOTS

Würth Elektronik is part of the family-run Würth Group, the world market leader for high-quality fastening and assembly technology. As early as 1971, Reinhold Würth laid

Direct sales and a close dialog with customers and partners have characterized the Würth company from the very beginning. Würth Elektronik continues this partnership in the electronics industry with its products, solutions and services.

What are our core Competencies?

Know-how, together with new impulses and ideas, form the basis for our worldwide development, production and sales of electronic and electromechanical components, printed circuit boards, intelligent power and control systems, services and solutions for a wide range of industries.

What sets us Apart?

At the heart of everything we do is a service philosophy characterized by partnership-based advice and support for our customers throughout the entire product life cycle. Whether it is a question of the specific selection of products and services or the essential transfer of knowledge, our competent employees are always in close contact with their customers. This creates a partnership that is always focused on

Why do Customers choose Würth Elektronik?

Customers appreciate working with a supplier who shares their values and standards and is willing to go the extra mile. They appreciate that Würth Elektronik has a clear understanding of their partners' needs and always has the right customer- and solution-oriented contacts. They see us as a company that stands for security, trust and predictability

What makes us stand out?

Partnership and collaboration characterize our corporate culture. We are a family business in the best sense of the word: a strong community driven by its genuine interest in other people and their causes. We see ourselves as a strong team in which all employees give their best and work together. What unites us is the passion to do a great job. We are curious, open and look forward to new encounters and challenges. We are the team you want on your side: competent, solution-oriented and committed. One guiding principle sums up our attitude: **"It's about people!"**

OUR VALUES: PARTNERSHIP, PASSION, PROGRESS

Our Values

Partnership

Partnership and collaboration are the foundations of our success. Our customers are our partners and we are committed to earning their trust in our skills and reliability. We value the contribution of each individual. By working together, we achieve the best results.

OUR MISSION: CREATING TOGETHER

**OUR VISION: TOGETHER WE MASTER THE
CHALLENGES TO BECOME THE FIRST CHOICE
FOR ELECTRONIC DESIGNERS.**

Common Development

Our Customer Advisory Board

With their slogan "More than you expect", the Würth Elektronik Company Group is committed to fulfill high expectations.

Würth Elektronik offers more than just general services – more than we are currently requested and demanded. We are not working according to the pattern "incoming order / processing order" but are furthermore interested in our business partners' needs today and tomorrow and what could be their demands after tomorrow. And foremost: How can we support them best there?

For co-designing our customers' and partners' future, we must have the finger on the pulse. The shared path on the road to success does not become accessible itself. Therefore, the knowledge of experts is valuable for a daily and future – focused orientation. On the basis of this responsibility, Würth Elektronik has convened an active advisory board to support the company management in all entrepreneurial matters. The Customer Advisory Board consists of selected members who will provide for the company with professionalism and competence they had gained in research, industry and trade.

In twice- yearly held meetings, the members will provide details about latest status and trends in their business fields as well as products and services supplied. There, orientation towards customer needs is and shall remain the central point of view. With such exchange of opinions we will learn about what is important on –site and beyond pure standards. A view from the outside and deep insights in relevant questionings coming up from the industry will regularly provide new impetus, concrete suggestions as well as opportunities for improvement and advancement.

We maintain the dialogue for you!
