THE POWER BEHIND POWER.

Impulses for the future of energy

Digitalization and the resilience of critical grid infrastructure

Components and solutions for **transformer manufacturers**

Stable and cost-effective **power supply in industry**

Optimizing the service life of equipment

Affordable **energy transition** and CO₂ reduction

Customer variance and **globalization** in transformer production

Standard-compliant grid integration of **wind and solar power**

At a glance

Family business since

1868

in the sixth generation
family owned

Economically healthy

850

million euros revenue in 2022
Highest rating (AAA)

Employees

3,800

61 nationalities
at 58 locations

World market leader

50%

of the world's electricity
flows through our products

Reliability

50+ years

of OLTC lifetime proves the
unmatched MR product quality

Present all over the world

8,000

customers
in 185 countries

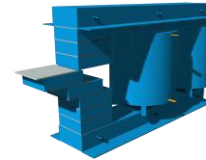

Factory Office x/x Subsidiaries/Locations

27 subsidiaries and 10 joint ventures worldwide

Solutions for load flow and power quality

Where Power meets Passion

- + 300 service heroes keep the global energy supply stable
- + Our software team drives the digitization of the products
- + In an international sales network we inspire our customers worldwide
- + 520 engineers working to shape a sustainable future

Recognized and awarded

reddot award 2015
winner

Sustainability & Corporate Citizenship

We are aware of our special responsibility towards the environment, customers, employees and society and support the Sustainable Development Goals of the United Nations.
