

Our long-term vision is shaping the future

Investing in our businesses, our people, and our communities since 1938

Learn More →

Our Businesses

We own and invest in businesses across four countries, offering a range of consumer products and business-to-business services. Our businesses have a record of outperforming the market because we help to grow and improve them over the long term.

Our People

As a privately-held entity, we know our employee owners are in a unique position to influence the success of the Enterprise. The actions of our employee owners have a direct impact on business outcomes and therefore, our ability to give back to our employees and the community.

Our Community

We believe our success is grounded in our commitment to live and work responsibly where we conduct business. Our companies contribute to a variety of non-profit organizations that support the underserved, education, the arts and medicine.
