Infranor Group: Manufacturer, Developer, and Engineering Partner in Servo Drives, Motors, and CNC Solutions

ISO 9001 & ISO 14001 Certified – Over 60 Years of Expertise in Industrial Automation

We design, manufacture, and distribute customized solutions ranging from individual components to complete systems—integrating servo motors, servo drives, electronic systems, controllers, and in-house developed software. Our technology ensures fast, precise, and synchronized movements across single or multiple axes.

Industrial Engineering Entities of the Infranor Group

Infranor operates worldwide, with direct subsidiaries across Europe, North America, and China. In other regions, we are represented by a carefully selected network of agents and distributors.

Cybelec: Manufacturer and developer of Computer Numerical Controls

Cybelec SA is a Swiss leader in high-performance **CNC solutions** for metal forming, with over 140,000 units installed globally. With expert in-house development and a strong global network—including a subsidiary in China—it provides sales, support, and retrofitting services worldwide. As part of the **Infranor Group since 1989**, it benefits from solid backing and long-term stability.

Mavilor: Manufacturer and developer of Servomotors

Mavilor Motors S.A. is a Spanish company founded in 1973 and part of the **Infranor Group** since 1979. With nearly 50 years of experience in the industry, it has established itself through creativity, innovation, and perseverance, offering customers a complete range of **servo motors designed for industrial automation**. Mavilor also develops **custom-made solutions** to meet specific requirements.
